**DENGUE FEVER CASES – CONTACT NATIONAL ENVIRONMENT AGENCY FOR INSPECTION**

There are several dengue fever cases in your block/neighborhood. Our officers had carried out a house-to-house check for mosquito breeding but were unable to have access to your house.

2 We wish to check your house to rule out the possibility of mosquito breeding within your premises. This is the safest way to prevent the continued transmission of the disease in your neighborhood and to protect you and your family.

3 Please contact the officer below as soon as possible to arrange for an inspection of your premises. On the day of inspection, you can identify our officer by the NEA authority he carries.
