Pupae

Aedes mosquito

what if unwanted guests move into your house while you are away?

You can prevent mosquito breeding in your home.

Seal off all gully and floor traps.

Cover toilet bowls properly.

Add sand granular insecticide to stagnant water in plants.

***Aedes* mosquitoes can spread dengue fever.**

While you are away on a holiday, *Aedes* mosquitoes may be breeding in a corner of your house where stagnant water is left uncovered. Prevent unwanted guests moving into your home by taking proper measures.
